

# FUTURE PROOF YOUR EQUIPMENT ANCHORAGE

## A SMARTER INVESTMENT

Healthcare Technology Management concerns the oversight of the equipment's life cycle from planning, purchase, installation, operation, and decommissioning. The problem is, mounting systems from earlier generations of technology don't always fit the next generation. That adds time and money to renovation projects. Those days are now over! BetterBuilt Solutions are designed to fit any manufacturer's specs, adjusting its height on the fly, and creating a smoother project experience.

## FEATURES

- Prefabricated to lessen installation cost and labor.
- 0-6" Field-adjustable mounting plate height.
- Modular/interchangeable equipment mounting plate.
- 6.0" - 5' total length customizable systems
- Sway brace free.\*
- Rigid .18 degree or less rotational mounting plate movement.

## BENEFITS

- Reduce project management costs and scope creep.
- Quickly adapt operating room suites with the latest healthcare technology. Reduce downtime.
- Select new medical technology at the last minute without added design and construction cost.
- Minimize future renovation costs and future proof solution.
- Increase space for large diffusers and air handling equipment.
- Compensate for obstructions below the finished ceiling.
- Eliminates equipment maintenance cost providing drift-free equipment performance. BetterBuilt never loosens over time.

\*Excludes deflection from building components & framework.

**DESIGNED TO  
PROVIDE FIELD  
ADJUSTMENT &  
MODULARITY.**
